There and back again

... a journey of complexity

What is this talk about?

How to grow in complexity but not complication ... from a Front End / Native perspective

Who am I to talk about this?

Novarum DX

FanDuel

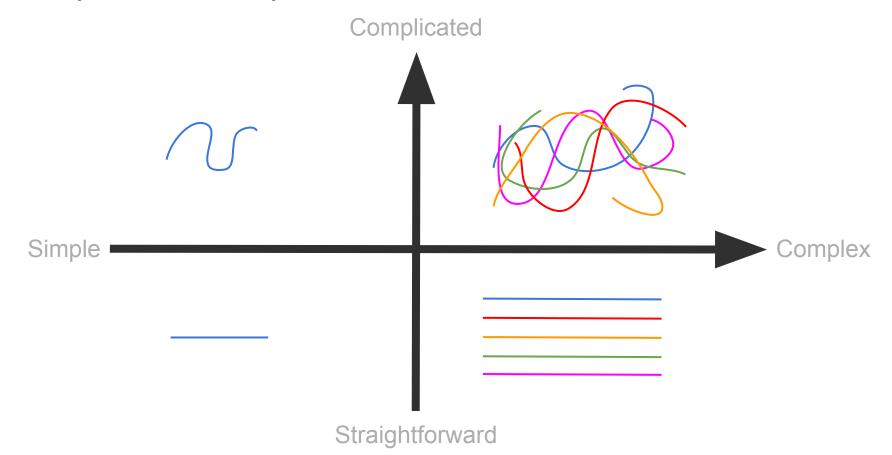

"Unified Modules"

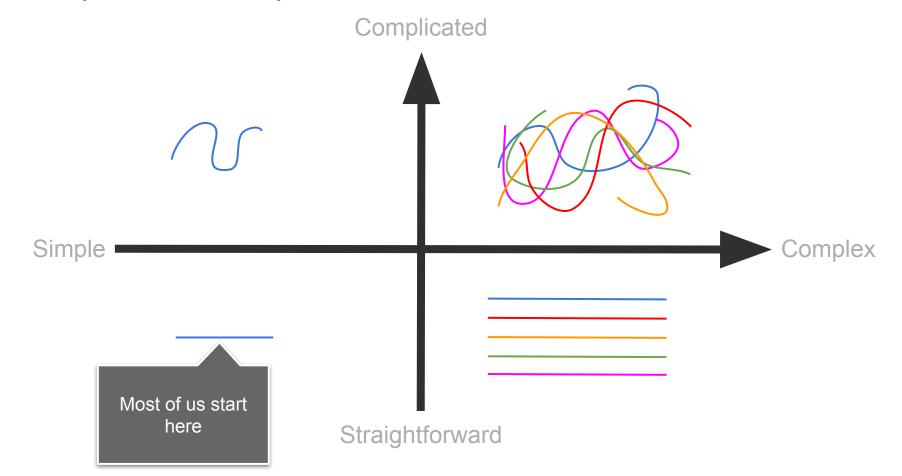

Very different companies

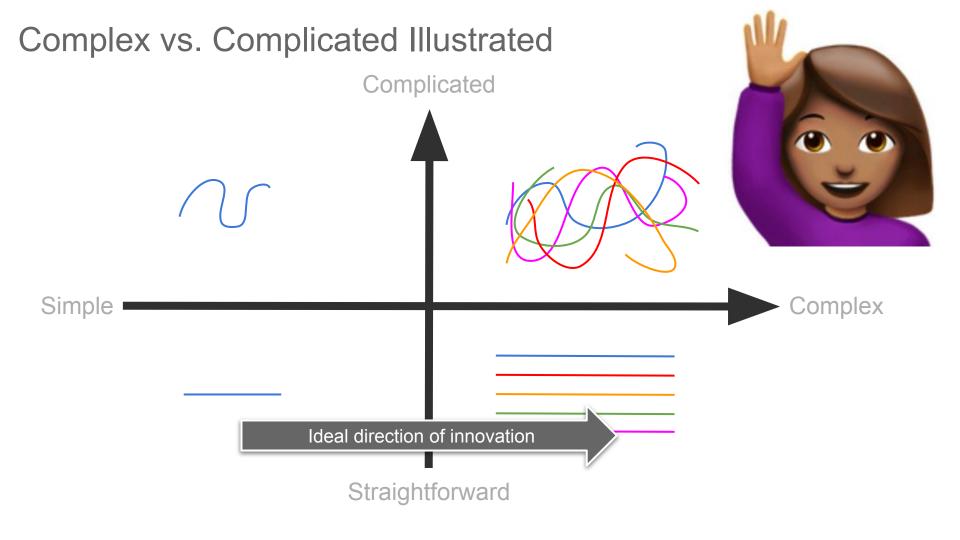

Both generate and support multiple multi platform apps with significant areas of common functionality

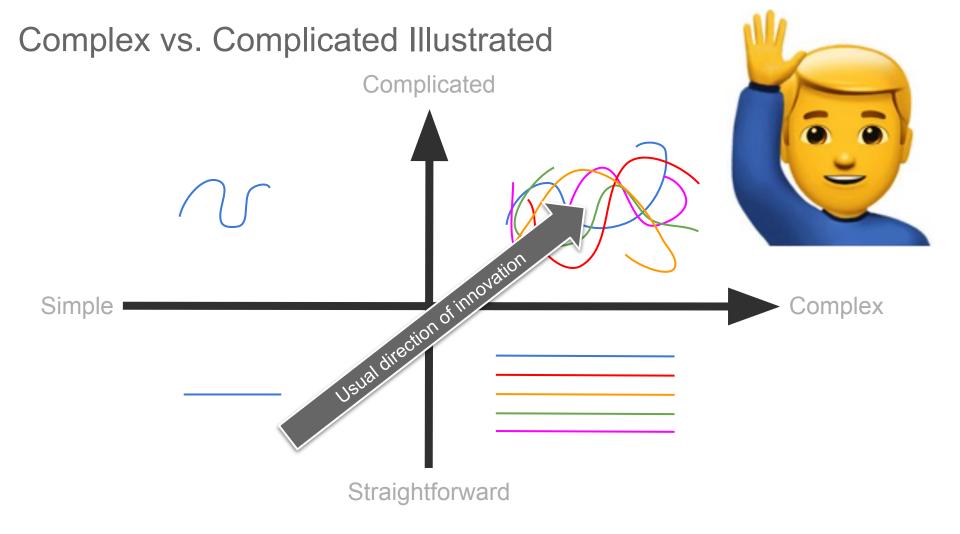

Complex vs. Complicated Illustrated

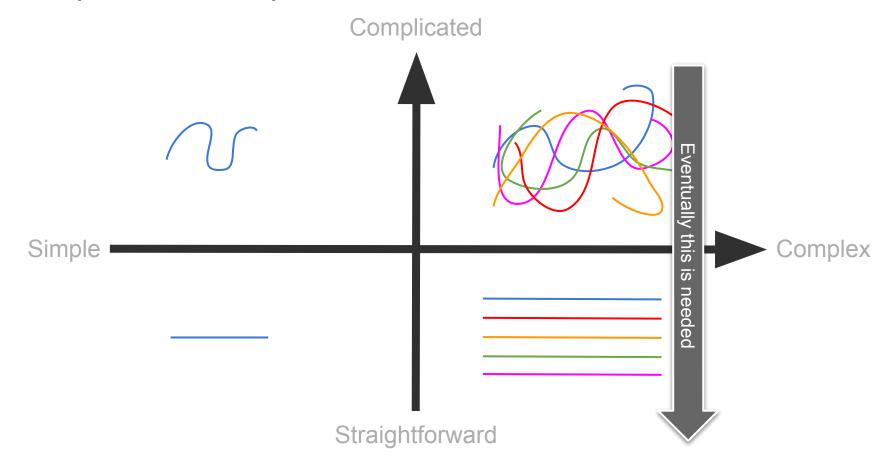

Complex vs. Complicated Illustrated

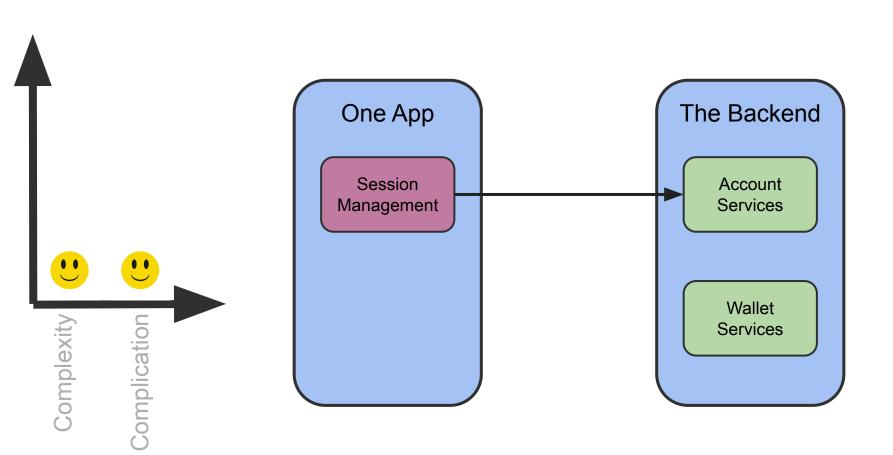

Complex vs. Complicated Illustrated

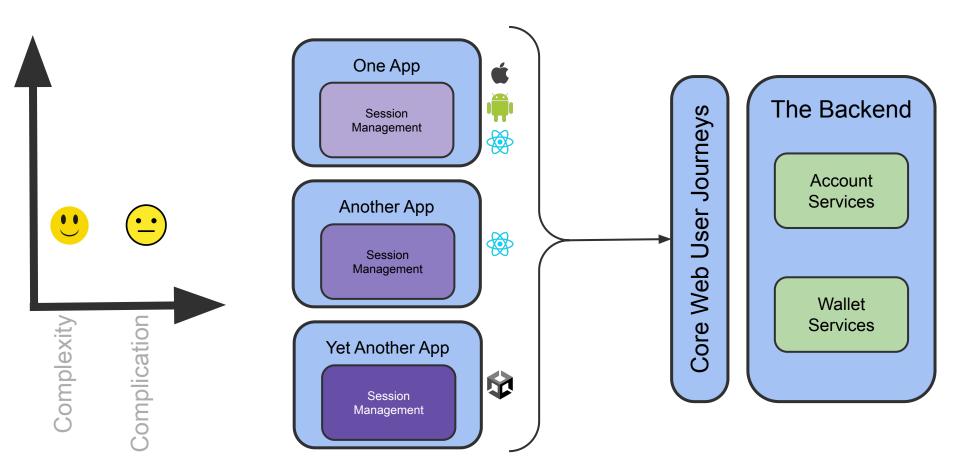

Part 1

Making complexity complicated

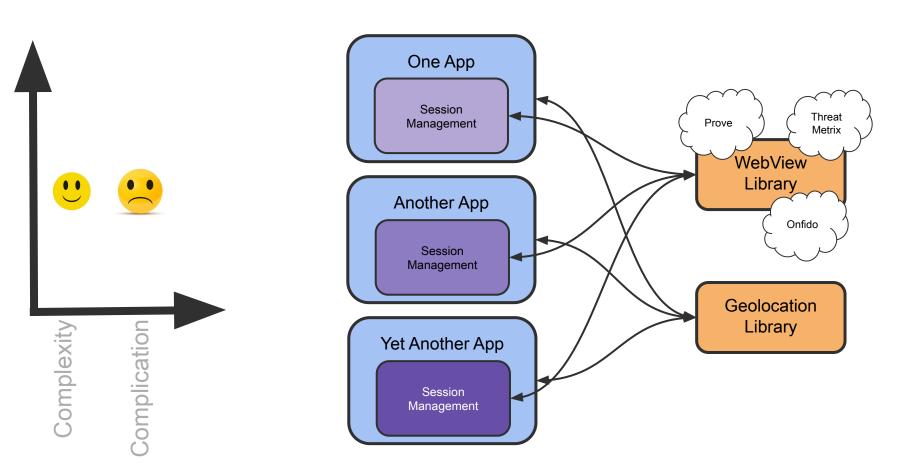

It all started so well...

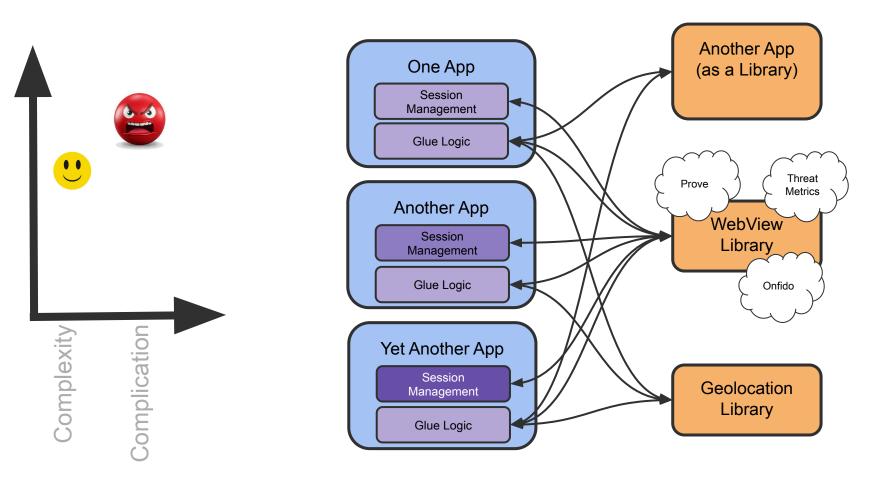

We made some more apps and a common web interface

Then came the native integrations...

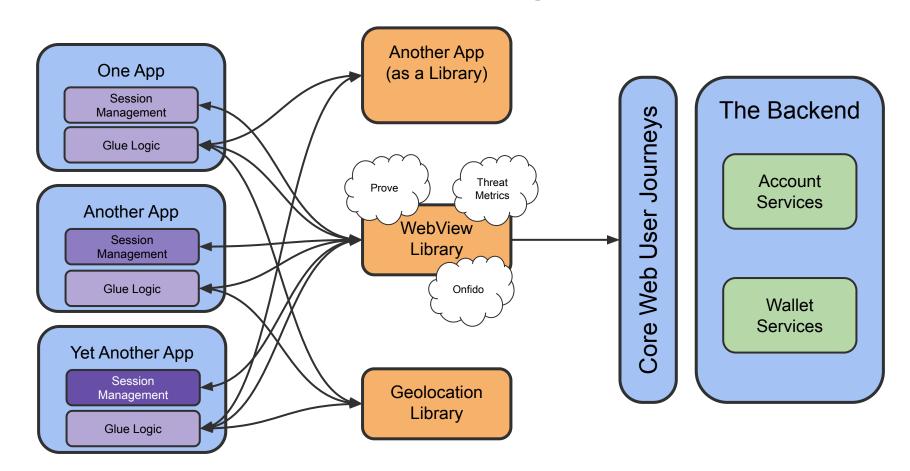

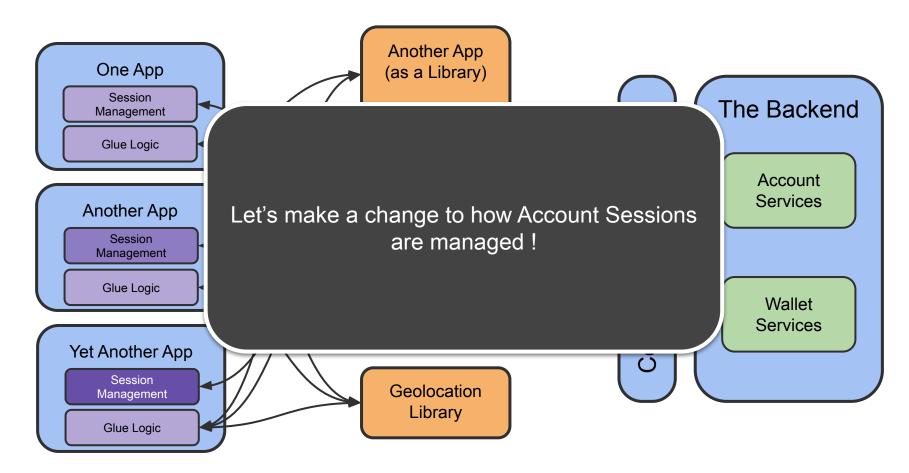

Now we cross sell experiences between apps...

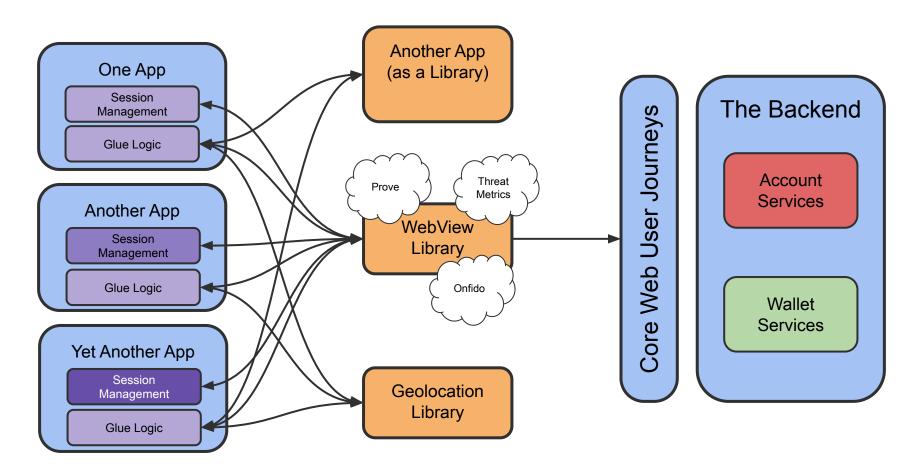

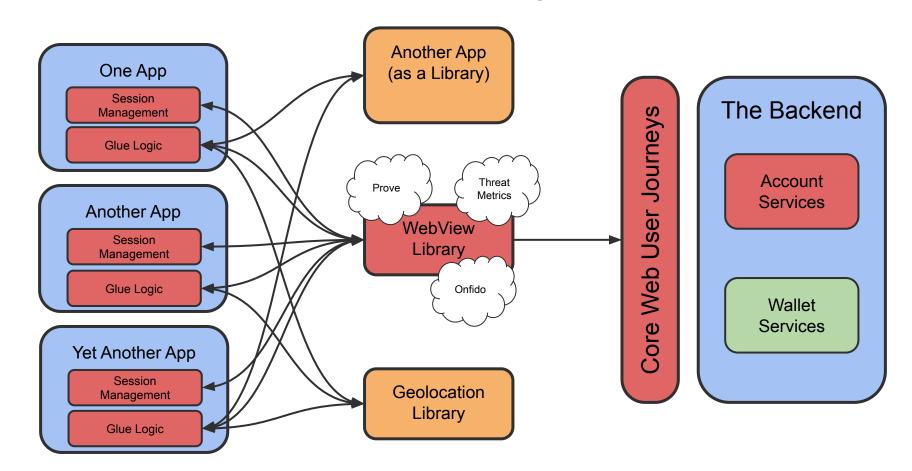

Part 2

Reflecting on our problems

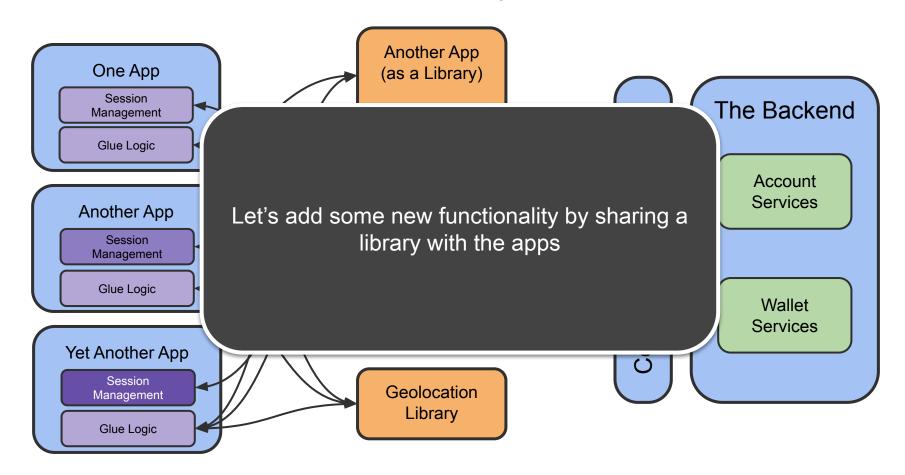

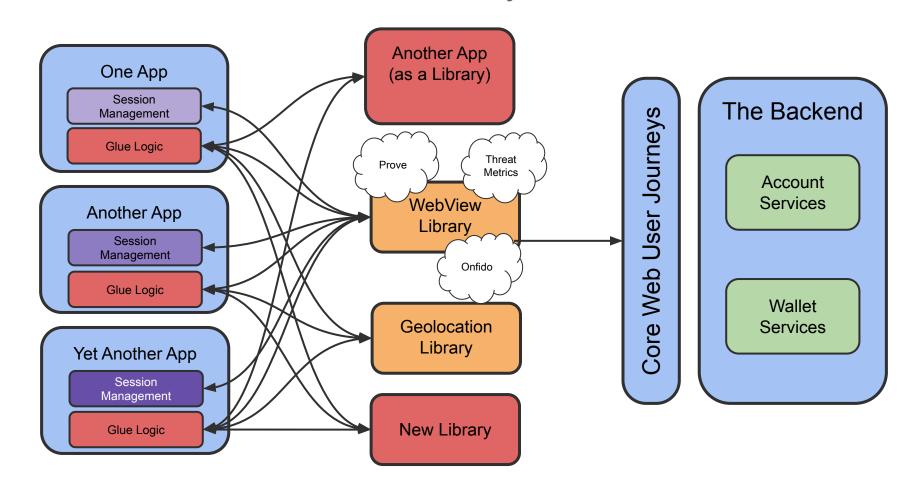

Now let's add some new functionality?

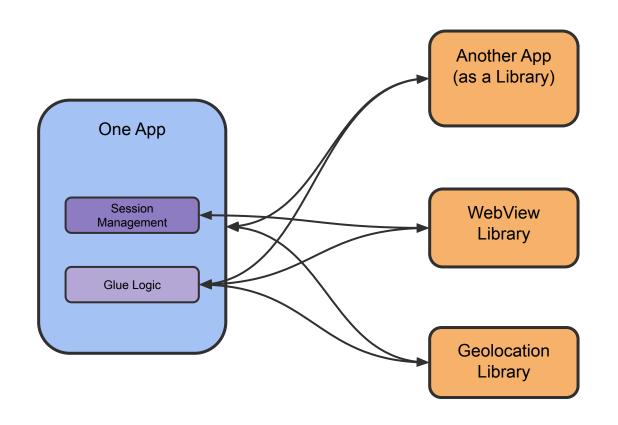

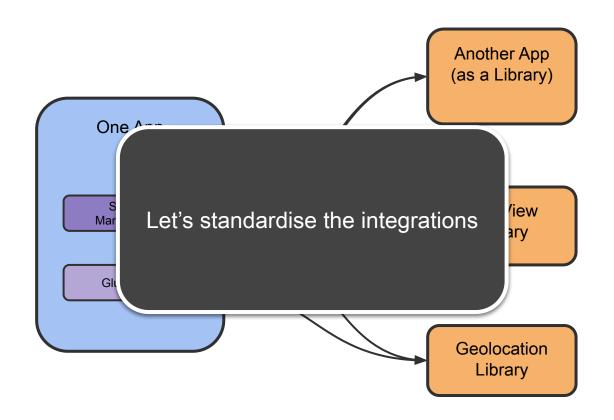

Now let's add some new functionality?

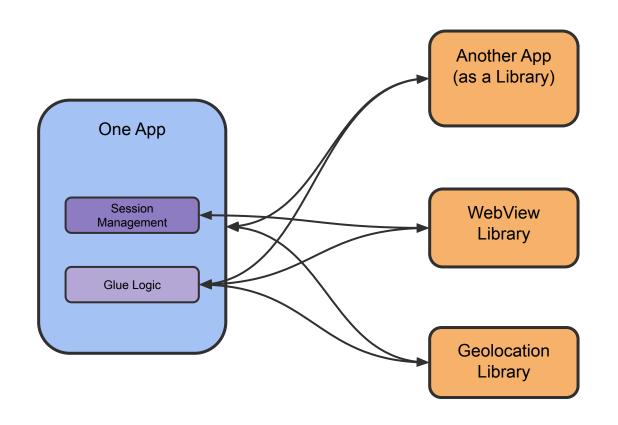

Part 3

The solution

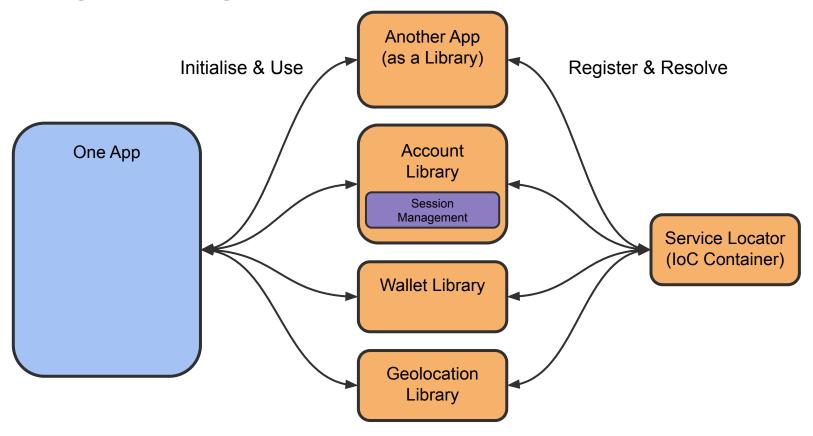

Focussing on a single app Another App (as a Library) Account One App Library Session Management Wallet Library Glue Logic Geolocation

Library

Focussing on a single app Another App (as a Library) Account One ary ion ment Now let's sort out these dependencies ibrary Geolocation Library

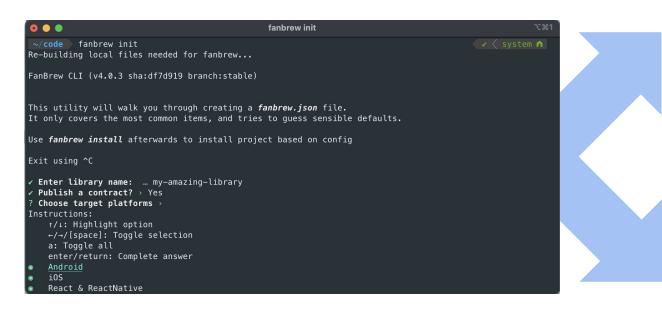

Focussing on a single app Another App (as a Library) Account One App Library Session Management Wallet Library Glue Logic Geolocation

Library

Tools for Teams

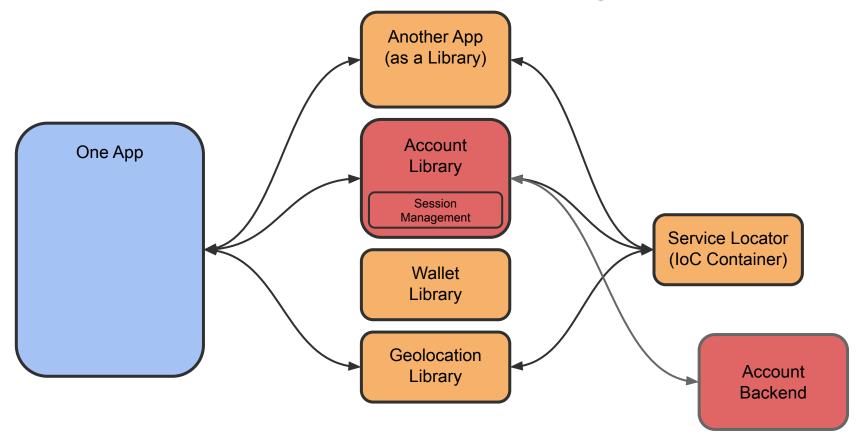

CLI Tool Called FanBrew

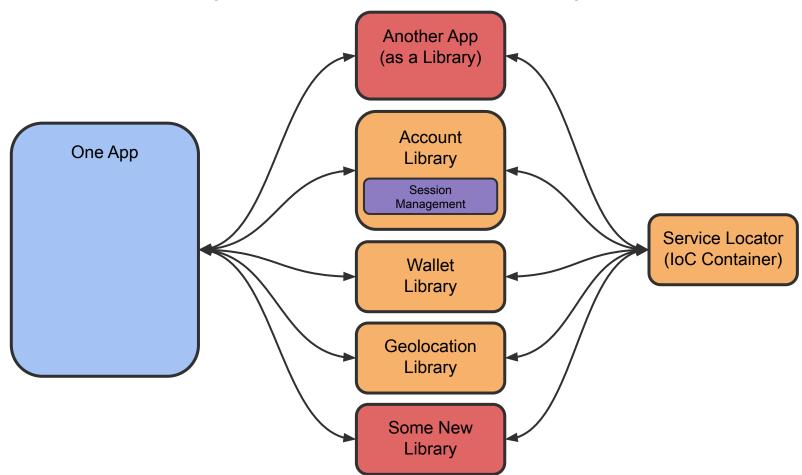

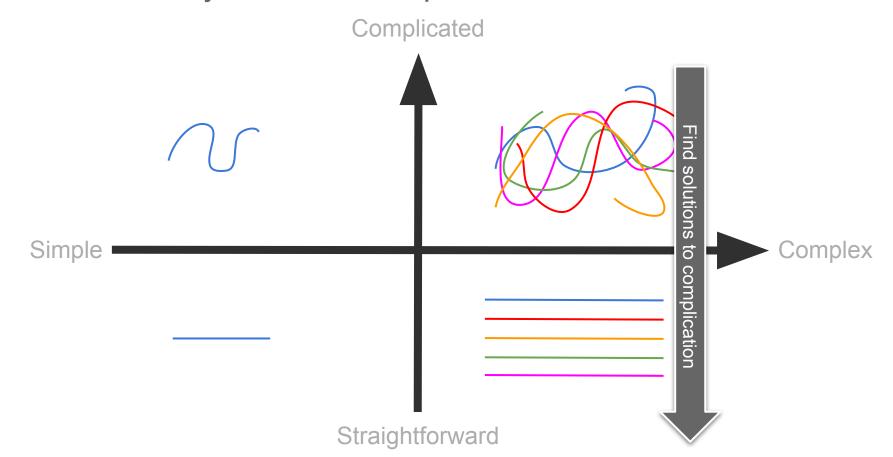

The Benefits - Limited Blast Radius of Change

The Benefits - Easy to add new functionality

Part 4

What we learned along the way

Lesson 1 - Early Stakeholder Engagement

Lesson 2 - Mindful of impact to roadmaps

- Senior Leadership Buy In is Critical
- Especially Product Leadership
- Establish Criteria for triaging change

Lesson 3 - Find Early Wins

Senior Leadership can be nervous about long lead time innovation which slows down roadmaps.

Show value as quickly as possible and build on it.
