AI Impact Report 2026

AI is reshaping how engineering teams build, review, and maintain software faster than most organizations can measure, secure, or plan for.

Only 31% of organizations currently measure the impact of AI-powered developer tools!

(Among those that do) Token usage is tracked by 58% of organizations....

...but the same number (58%) say token usage metrics are ineffective at gauging real value from AI tools!

Measuring the impact of AI.... what gives Dan???

Measuring the impact of AI.... what gives Dan???

Measuring the impact of AI.... what gives Dan???

Measuring the impact of AI.... what gives Dan???

Also in the AI Impact Report 2026!

- Debugging without AI has become harder (42%)
- Expect fewer junior hires due to AI (62%)
- Haven't addressed agent identity and access at all (25%)
- Simply reuse human credentials and access controls (24%)
- Have no formal policy for AI agents and non-human actors (32%)
